

**Amer** is an industrial group, specialized since 1948 in the production of technological solutions for electric motors and motion: AC and DC motors, gearmotors, steering systems, and complete traction systems for battery-powered vehicles and applications.

## The numbers of a global group

40000 smq  
of production facilities

550  
employees

86%  
of products exported

+1 million  
products per year

89 countries  
in which we operate

### ● THE NEED

Amer was looking for a qualified partner to provide outsourcing services, **Disaster Recovery**, and **System Management** for its data center and three operational sites located in Valdagno and Schio (Italy) and Balingen (Germany).

### ● THE CHALLENGE

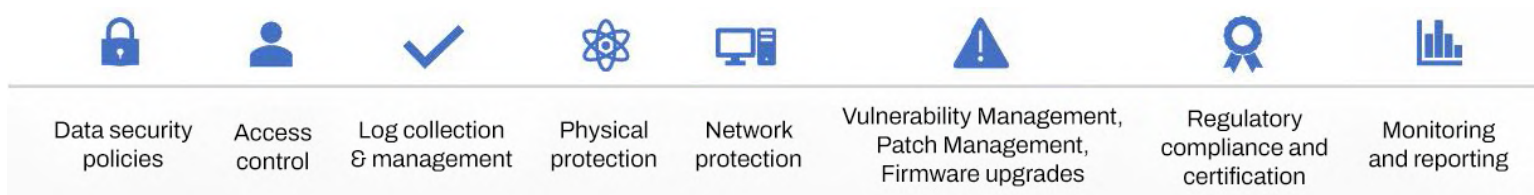

Migrating to a new infrastructure while ensuring a seamless transition, simultaneously improving the operational efficiency of the IT infrastructure and the data security of the Amer Group.

### ● THE SOLUTION

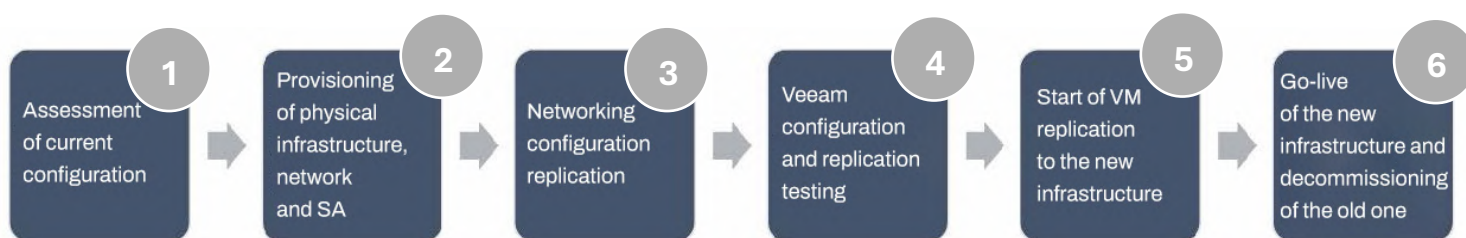

Migration of private cloud services, system management, and integration with Amer's existing systems.

- Primary Data Center Virtualization
- Disaster Recovery
- System Management
- Internet connectivity integrated with SASE architecture
- Backup Services
- Graphics VDI Colocation

## ● SECURITY REQUIREMENTS

## ● MIGRATION PHASES

IT outsourcing allows the company to focus on its core business—strategy, sales, and innovation.

Delegating IT management to experts reduces the burden on internal resources and provides the flexibility to quickly adapt IT services to evolving business needs, in terms of both volume and complexity.

### OUTSOURCING BENEFITS

- ✓ Cost reduction
- ✓ Access to specialized expertise
- ✓ Continuous updates
- ✓ Greater flexibility and scalability
- ✓ Time optimization
- ✓ Proactive management
- ✓ Enhanced security and regulatory compliance
- ✓ Technological innovation
- ✓ Risk reduction and management
